SCS SideKick Direct Injection System

Nobody ever said agriculture was simple. But with the SCS-Sidekick™ on your side, applying chemicals has never been easier. You'll save time and money by reducing chemical waste, and eliminating tank mixing and rinsing. With the Sidekick there is no need for a calculator to figure out how much chemical to add when refilling. Just load chemical into the injection tank, program the rate per acre and spray. The rugged Sidekick system attaches to virtually any sprayer console for instant direct injection capabilities.

SCS Sidekick Console

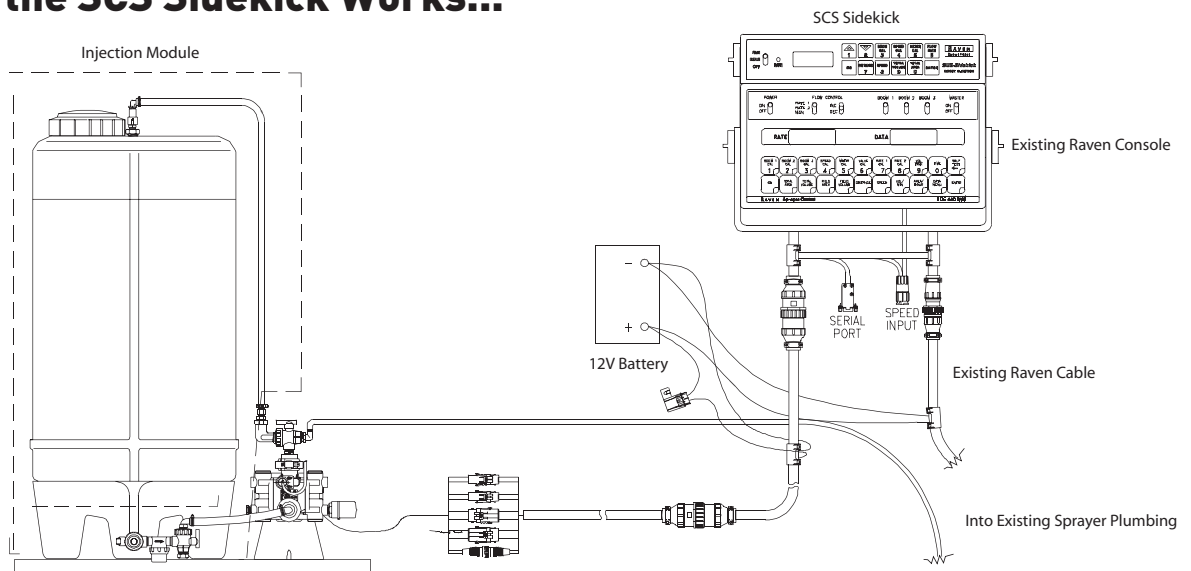

- Direct interface with virtually any control console
- Serial port for GPS compatibility
- Precision control with up to seven boom inputs
- Compact design means extra room in the cab and on the sprayer

SCS Sidekick Module

- High Volume 5-200oz
- Low Volume 1-40oz
- Positive displacement piston pump for fixed displacement
- Pressure side injection makes sure chemical is at the booms when you need it

How the SCS Sidekick Works...
